### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 5-12, 14 and 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U. S. Patent No. 7,016,970 to Harumoto et al.

As per claims 1, 2, 6-8, 11, 12, 14 and 20, Harumoto et al. disclose the limitations of these claims (col.10, lines 42-62).

As per claims 5, 9 and 10, Harumoto et al. disclose these features (col.16, lines 53-61).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 4, 13, 15, 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harumoto et al. as applied to claims 1, 8 and 14 above, and further in view of the examiner taking official notice.

As per claims 3, 4 and 16, Harumoto et al. do not specifically disclose the limitations of these claims. The examiner, however, takes official notice that these elements are well known in the art of security systems. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Harumoto et al. since they comprise very well known elements necessary for the entire system to function in a secure and controlled environment.

As per claims 13 and 15, Harumoto et al. do not disclose these features. The examiner, however, takes official notice that these elements are well known in the art of security systems. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Harumoto et al. for the same reasons as stated above.

As per claims 17-19, Harumoto et al. do not disclose the elements either as stated above.
